## Exercise 2 (15 points)

Read the text below and think of the word which best fits each space. Use only <u>one</u> word in each space. There is an example at the beginning.

### A. Parenting should be taught to children

Schools should teach all children parenting (0) \_\_\_\_\_\_ relationship skills, according (1) \_\_\_\_\_\_ a recent report. Children spend virtually all their time on subject learning and very (2) \_\_\_\_\_\_ on learning how to learn, how to manage work and how to relate to others.

That's why, for instance, divorce is seen as a solution to a relationship problem rather (3) \_\_\_\_\_\_ an exchange of one set of problems for another. Also, there is a widespread belief that success in marriage or other long-term relationship depends (4) \_\_\_\_\_\_ romantic love rather than on careful work, understanding and self-awareness.

Ed Thornton, the author of the report, suggests an ambitious programme of education to challenge such cultural norms. Additionally, he wants soap operas to include not only domestic crises but (5) \_\_\_\_\_\_ positive examples of families successfully working through their problems. Mr. Thornton argues that teaching pupils how to understand others would mean they would learn subjects more quickly and become more efficient employees.

#### **B.** Spare that spider

Why, you wonder, should spiders be our friends? Because they destroy many insects, and insects include some of the **(6)** \_\_\_\_\_\_ enemies of the human race. Insects would make it impossible for us to survive in the world; they would eat up all our crops and herds if it were not for the protection we get from insect-eating animals.

We owe a lot to the birds and beasts that eat insects, **(7)** \_\_\_\_\_\_ all of them put together kill only a fraction of the number destroyed by spiders. Moreover, unlike some of the other insect eaters, spiders never do the least harm **(8)** \_\_\_\_\_\_ our belongings or us.

Spiders are **(9)** \_\_\_\_\_\_ insects, as many people think, nor even nearly related to them. One can tell the difference almost at a glance, for a spider always has eight legs and an insect never more than six.

Spiders are busy at least half the year with chasing insects. It is impossible to guess how many they kill, but spiders are hungry creatures, not satisfied (10) \_\_\_\_\_\_ only three meals a day.

## C. Sports psychology

Sports psychology is the science of behaviour applied (11) \_\_\_\_\_\_ exercise and sports participation. With levels of competition rising ever higher and differences between competing athletes being measured in fractions of a second, increasing (12) \_\_\_\_\_\_ of sportsmen and women are using sports psychologists to help them gain a competitive edge.

Not only (13) \_\_\_\_\_\_ physical fitness, speed, strength or flexibility important for those aspiring to win the competition or (14) \_\_\_\_\_\_ the world record; what counts even more now is the ability to cope with stress effectively and to withstand emotional strain generated (15) \_\_\_\_\_\_ fierce competition. This is exactly what sports psychologists help them achieve.
